Vol. 47. No 5-6/2012

Monthly scientific and technical journal

Published by:

The Union of Electronics, Electrical Engineering and Telecommunications /CEEC/, BULGARIA

Editor-in-chief:

Prof. Ivan Yatchev

Deputy Editor-in-chief:

Prof. Stefan Tabakov

Editorial Board:

Prof. Georgi Mladenov, Bulgaria

Prof. Georgi Stoyanov, Bulgaria

Prof. Emil Vladkov, Bulgaria

Prof. Emil Sokolov, Bulgaria

Prof. Ervin Ferdinandov, Bulgaria

Prof. Jecho Kostov, Bulgaria

Prof. Ivan Dotsinski, Bulgaria

Assoc. Prof. Ivan Shishkov, Bulgaria

Prof. Lyudmil Dakovski, Bulgaria

Prof. Mintcho Mintchev, Bulgaria

Prof. Nickolay Velchev, Bulgaria

Prof. Rumena Stancheva, Bulgaria

Assoc. Prof. Seferin Mirtchev, Bulgaria

Prof. Takeshi Tanaka, Japan

Dr. Vladimir Shelyagin, Ukraine

Acad. Prof. Yuriy I. Yakymenko, Ukraine

Assoc. Prof. Zahari Zarkov, Bulgaria

Editor of this issue:

Corr. Memb. of BAS, Prof. Georgi Mladenov

Technical editor:

Assoc. Prof. Dr. Eng. Elena Koleva

CONTENTS

Special issue: Papers from 10-th International Conference on Electron Beam Technologies – EBT 2012

Preface by Corr. Member of BAS, Prof. Dsc. G. Mladenov 4

NANOTECHNOLOGIES

A. Bencurova, V. Barak, A. Konecnikova, I. Kostic, P. Nemeč, A. Ritomsky

Investigation of the high sensitive negative resist for the photomasks fabrication by e-beam lithography 5

A. Bencurova, P., Nemeč, I. Kostic, K. Vutova, E. Koleva, G. Mladenov

Investigations of sensitivity of electron resists 10

W. Lu, X. Kong, J. Liu, L. Han

Exposure mechanism for three-dimensional micromachining manner of electron beam 14

G. Pashkevich, A. Orlov, O. Bogdan

Use of «Electromask» pattern generator and image repeater for large-area subwavelength nanolithography 18

U. Maschke, M. Bouchakour, L. Mechernene

Electron beam and ultraviolet cured polymer dispersed liquid crystal materials 21

Z. Boubberka, V. Prevot, C. Forano, G. Mailhot, Z. Derriche

Degradation by irradiation of organic dye molecules on TiO₂/LDH nanocomposites. 26

ELECTRON GUNS AND ELECTRON BEAM EQUIPMENT

Victor M. Sveshnikov

Simulation of electron-optical systems with high accuracy 31

D. Toader, M. Oane, I. Mihailescu, C. Ticos, N. Serban, C. Ristoscu, K. Vutova, G. Georgescu, V. Donchev

Beam dynamics: a new computational approach 33

D. Kovalchuk

Development of electron beam melting equipment in JSC NVO Chervona Hvilya 36

I. Vlček, M. Zobač

Electron gun production quality control 40

<i>C. Ribton</i> Effective design of electron beam processing systems by trending	44
<i>V. Melnyk, I. Melnyk, B. Tugay</i> Electric control of triode glow discharge electron guns power	48
<i>V. Tutyk, A. Ovcharuk, D. Maslenikov</i> Low vacuum gas discharge electron gun for technological processes	53
<i>V. Braverman, V. Belozercev, N. Goryashin, T. Veisver, A. Lelekov, V. Bashenko</i> The device with fluxgate sensor for joint tracking	58
<i>S. Gupta, E. Kandaswamy, A. V. Bapat</i> Numerical model for determination of bias cut-off voltage in axisymmetric triode type electron guns	64
<i>S. Kornilov, N. Rempe, A. Svetlakov, Yu. Sharopin</i> The e-beam welding system automatization on the basis of plasma-cathode guns is the following: visualization and keeping an electron beam on joint weld by signal processing of the backscattered electrons	70
<i>M. Zobač, I. Vlček, S. Šidlo, I. Ungerman</i> High voltage stability measurements	75
<i>A. Shcherbakov, A. Goncharov, A. Sliva, V. Dragunov, V. Ruptsov</i> Analysis of the processes in the electron beam technological equipment during the pulse modulation of beam power	79
<i>D. Maslenikov, N. Maslianyi, V. Tutyk</i> Generation of electron beams in plasma electron source on the basis of carbonates decomposition	85
<i>V. Gruzdev, V. Zalesski, I. Rusetski</i> The electron gun with a plasma emitter and isolated emitter electrode	89
<i>E. A. Azizov, A. I. Emelianov, N. B. Rodionov</i> Investigation of arc suppressing processes in high-current high-voltage switch for supply systems of high-scale physical plants	93
ELECTRON BEAM WELDING AND CUTTING	
<i>V. Belenkiy, D. Trushnikov</i> Development of a non-defect technology at electron beam welding	99
<i>D. Trushnikov</i> The use of secondary-emission signal for control at EBW	103

<i>D. Trushnikov, E. Koleva, V. Belenkiy, G. Mladenov</i> Experimental investigation of the weld cross section at electron beam welding of high-strength steel	108
<i>E. Koleva, G. Mladenov, D. Trushnikov, V. Belenkiy</i> Model-based approach for investigation of electron beam welding of high-strength steel	115
<i>P. Denysyuk</i> Electron beam welding technology of butt joints with variable thickness of high-pressure turbine vanes segments	119
<i>A. Goncharov, E. Terentyev, A. Marchenkov, M. Portnov</i> Electron beam welding of bronzes to 316 L(N) steel	123
<i>A. Sliva, V. Dragunov, A. Goncharov, A. Shcherbakov</i> Electron beam welding method in the magnetic field	128
<i>V. Khaskin, V. Shelyagin, V. Spivak, D. Vaits</i> Laser welding in vacuum as an alternative to electron-beam welding	134
<i>V. Melyukov</i> Mathematical modeling of the optimal electron beam welding on basis of inverse problem's method	138
<i>L. Dupák</i> Electron beam cutting of non-metals	143
<i>T. Hassel, A. Beniyash, N. Murray, R. Konya, Fr.-W. Bach</i> Non-vacuum electron beam for cutting application	147
ELECTRON BEAM FUNCTIONAL COATINGS AND SURFACE MODIFICATION	
<i>G. Mattausch, B. Scheffel, O. Zywitzki, C. Metzner, Fh. Roegner</i> Techniques and tools for the plasma-activated eb high-rate deposition of Zirconia	153
<i>G. Mueller, R. Fetzer, W. An, A. Weisenburger, V. Engelko</i> Development of Surface Waviness during Pulsed Electron Beam Treatment	160
<i>G. Grumbt; S. Schmied; R. Zenker, K. Weigel, K. Bewilogua</i> Microstructure and selected properties of PVD TiAlN hard coated steels after additional electron beam surface hardening	164
<i>K. Fritsch, M. Klemm, A. Buchwalder, R. Zenker</i> EB surface alloying of magnesium alloys AZ31 B and AZ91 D	170
<i>A. Dalke, A. Buchwalder, H.-J. Spies, M. Klemm, R. Zenker</i> Electron beam surface alloying of aluminium materials using high-melting Fe-base additives	176
<i>R. Minakova, N. Grechanyuk, E. Khomenko</i> The peculiarities of structure formation and properties of Cu-Fe composite material condensed from vapor phase	182

<i>Yu. Burachevsky, D. Zolotukhin, V. Burdovitsin, M. Fedorov.</i> Parameters of electron beam and hollow cathode discharge plasmas at fore-pump pressure for silicon nitride films growth	188
<i>A. Surzhikov, T. Frangulyan, S. Gyngazov, S. Grigor'ev, N. Koval</i> Modification of alumina-zirconium ceramics by low-energy high-current electron beams	192
<i>X. Kong, Q. Dai, L. Han, Q. Feng, M. Chu, H. Xue, J. Li</i> Effect of electron-beam annealing duration on magnesium diboride film superconductivity	196
<i>A. Surzhikov, E. Lysenko, S. Gyngazov, T. Frangul'yan, N. Koval, I. Goncharenko, S. Grigor'ev</i> Ion-plasma treatment of lithium–titanium ferrites	201
<i>Y. Marchenko, I. Petrik, P. Zhemanyuk</i> The tryout of technology of the electron beam annealing of compressor drums made of titanium alloy BT8	205
<i>Y. Marchenko, I. Petrik, P. Zhemanyuk</i> Technology of electron-beam building-up of filler wires when repairing gas turbine engine parts	209
<i>G. Mattausch, B. Graffel, F. Winckler, F.-H. Roegner, M. Merkel, K. Wrobel, R. Boehme, H. Schlemm</i> Thermal surface treatment at the micrometer scale - challenges and opportunities for the electron beam	213
ELECTRON ACCELERATOR APPLICATIONS	
<i>A. Ruktuev, M. Golkovski, N. Kuksanov, I. Bataev, T. Zhuravina, S. Veselov, V. Bataev, A. Bataev</i> Metallographic features of Ti – Ta – Nb coats, fused deposited on the titanium substrate by extracted in atmosphere electron beam with 1.4 MeV electrons energy	223
<i>D. Kuznetsov, I. Filatov, Yu. Surkov</i> Plasma-chemical conversion of toxic impurities in air ionized by pulsed electron beams and discharges	229
<i>D. Kuznetsov, Yu. Surkov, V. Uvarin</i> Infrared laser on xenon atom with rep-rated electroionization pumping	235
<i>I. Călinescu, D. Martin, D. Ighigeanu, A. Gavrilă, A. Trifan, M. Patrascu</i> Nanoparticles synthesis by electron beam radiolysis	241

<i>I. Călinescu, D. Martin, D. Ighigeanu, M. Toma, A. Trifan</i> Uses of fine water droplets in electron beam treatment of flue gases	249
<i>D. Ighigeanu, D. Martin, I. Calinescu, E. Manaila, G. Cracium, A. Ighigeanu, M. Toma, T. Negreanu-Pirjol</i> Electron beam and microwave combined irradiation technology for environment protection	256
<i>A. Popovici, D. Martin, C. Grigoriu, M. Toma, G. Cata –Dani, D. Ighigeanu, R. Vasilache, G. Florescu</i> Generation of Intense relativistic electron beams by 1 PW laser-target interactions at “CETAL” facility	262
<i>T. Tanaka, T. Hironaka, Sh. Hayashi, I. Koyama</i> Disinfection and sterilization by using plasma-based ion implantation	268
ELECTRON BEAM MELTING AND REFINING	
<i>K. Vutova, V. Donchev</i> Time-dependent thermal model for electron beam melting and refining of metals and alloys	273
<i>V. Donchev, M. Oane, K. Vutova, I. Mihailescu, V. Vassileva, E. Koleva, G. Mladenov</i> Heat transfer study based on time-dependent mathematical model and experimental data at EBMR of Ta	280
<i>V. Vassileva, K. Vutova, V. Donchev</i> Recycling of alloy steel by electron beam melting	285
COMPANY PRESENTATIONS	
<i>R. Andok, V. Barak, A. Bencurova, I. Caplovic, P. Hrkut, P. Hudek, V. Jablonska, A. Konecnikova, I. Kostic, L. Matay, P. Nemeč, A. Ritomsky</i> Centre of Excellence Presentation - Laboratory of E-beam Lithography at the Slovak Academy of Sciences	292
<i>D. Kovalchuk</i> JSC "NVO "Chervona Hvilya", Kiev, Ukraine	296
<i>M. Heinrich</i> VON ARDENNE in Dresden, Germany	298
<i>P. Zapryanov</i> TARGETS LTD Plovdiv, Bulgaria	302
<i>M. Heinrich</i> JSC "NVO "Chervona Hvilya", Kiev, Ukraine	296
<i>J. Flinspach, G. Sergiienko</i> ALD Vacuum Technologies GmbH, Hanau, Germany	303
Authors' Index	304
