

Instructions for Preparing the Manuscripts for EBT 2018 – Template Title of the paper “bold Times New Roman 18 pt”-

FirstName A. FamilyName – bold italic Times New Roman 18 pt

These instructions give you basic guidelines for preparing the camera-ready EBT 2018 papers. These instructions have been prepared in the required format. The abstract is a brief (50-80 words) synopsis of your paper. Its use is to provide a quick outline of your presentation, giving the reader an overview of the research. This is an important aspect of your paper, as it is this description that may attract the reader to continue and finish your report. Keywords should be so chosen that they best describe the contents of the paper. In most cases, these words can be found in the title and abstract. Noun forms without articles must be used. The use of hyphens and prepositions should be avoided.

Bulgarian: Title, authors, abstract – PLEASE, COPY the abstract in English once again here!

These instructions give you basic guidelines for preparing the camera-ready EBT 2018 papers. These instructions have been prepared in the required format. The abstract is a brief (50-80 words) synopsis of your paper. Its use is to provide a quick outline of your presentation, giving the reader an overview of the research. This is an important aspect of your paper, as it is this description that may attract the reader to continue and finish your report. Keywords should be so chosen that they best describe the contents of the paper. In most cases, these words can be found in the title and abstract. Noun forms without articles must be used. The use of hyphens and prepositions should be avoided.

Introduction

Authors must submit a softcopy version of the paper in MS Word format via e-mail (ebt-conference@abv.bg) or upload it by the conference website <http://ebtconference.com/abstractpaper-submission.html>.

B. Fonts

Use Times New Roman Font. Try to follow the font sizes specified in Table 2, as best you can.

Table 2

Recommended fonts (10 pts)

Font Size	Bold	Italic	Text
8			Authors' names - Left, Spacing before; 18 pt
10			Main text in two columns
10	YES		Headings (Abstract, Introduction, References etc.) - Spacing Before
10		YES	Sub-heading (1.1, 1.2, etc.)- Spacing Before 12 pt, Spacing
8			References main text, table names, table captions, figure
8			Footnotes, sub- and superscripts

How to Construct the Paper

A. Manuscript Layout

In formatting your A4-size paper (210×297 mm) with the text area 225×160 mm, set the margins as given in Table 1.

You should left- and right-justify your columns. On the last page of your paper, try to adjust the lengths of the two columns so that they are the same. Use automatic hyphenation, if you have it. Don't forget to check spelling.

Table 1

Setting margin distances (10 pts)

Top margin	3.6 cm
Bottom margin	3.6 cm
Left margin	2.5 cm
Right margin	2.5 cm
Header margin	2.8 cm
Footer margin	2.8 cm
Column spacing	0.8 cm

C. Equations

Number equations consecutively with equation numbers in parentheses flush with the right margin, as in (1). To make your equations more compact, you may use the solidus (/), the exp function, or appropriate exponents. Italicize Roman symbols for quantities and

variables, but not Greek symbols. Use a long dash rather than a hyphen for a minus sign. Use parentheses to avoid ambiguities in denominators. Punctuate equations with commas or periods when they are part of a sentence. Be sure that the symbols in your equation have been defined before the equation appears or immediately following. When you refer to equations in the text, refer to (1).

D. References

List and number all references at the end of the paper. When referring to them in the text, type the corresponding reference number in square brackets as shown at the end of this sentence [1]. Number the citations consecutively.

The sentence punctuation follows the brackets. Give all authors' names; do not use "et al" unless there are six authors or more. Papers that have not been published, even if they have been submitted for publication, should be cited as "unpublished". Papers that have been accepted for publication should be cited as "in press". Capitalize only the first word in paper title, except for proper nouns and element symbols, For papers published in translated journals, please give the English citation first, followed by the original foreign-language citations.

Illustrations

Position figures and tables at the tops and bottoms of columns, if possible. Large figures and tables may span both columns. Figure captions should be below the figures; table captions should be above the tables. Try to place the figures and tables after their first mention in the text. Use the abbreviation even at the beginning of a sentence (e.g.. "Fig. 1"), all half-tone illustrations (pictures /photographs) should be clear black and white prints. Figure format *.bmp, pictures / photograph format - *.jpg.

Helpful Hints

A. Abbreviations and acronyms

Define abbreviations and acronyms the first time they are used. Acronyms such as MOS, IC, ac and dc do not have to be defined. Redefine acronyms when first used in the text, even if they have been defined in the abstract.

B. Other recommendations

All publications cited in the text should be presented in a list of references following the text of manuscript.

The references should be given as that is shown at the end of the paper.

Figures will be included in the text columns. Use the column width as limitation of maximum figure width.

Please bigger (from one column width) figures put with the wide dimension extended to the page width, changing the page *Format* locally for this figure from *two columns* to *one column* (See Fig.1 bellow) and please continue the rest part of the paper as two-column text, as was recommended - through fulfilling the instructions shown in Table 1.

Conclusions

Designed for the "Electromask Series 6000" machine installation software allows us to manage all systems from a PC and convert data from other formats. We obtain accurate mechanical movements of 0.20 micrometers in the field of 250 mm x 250 mm.
