

# ***CONTENTS***

Preface	5
Scientific Program of EBT 2016 International Conference	7
Abstracts	21
EBT 2018 Conference Scientific Papers	73
Mathematical modeling for energy beam additive manufacturing <i>Georgi Mladenov, Elena Koleva, Dmitriy Trushnikov</i>	73
EBW of aluminium alloys with application of electron beam oscillation <i>Andrey P. Sliva, Victor K. Dragunov, Egor V. Terentyev, Alexey L. Goncharov</i>	79
The use of non-vacuum electron beam (NVEB) technology as a universal manufacturing process for welding and cutting of high-strength steels <i>A. Beniyash, H. G. Klimov, T. Hassel</i>	86
Features of the New VON ARDENNE BeamGuidance System <i>Udo Liess, Jörg Faber, Matthias Neumann, Marko Plaschkies, Lars Ullmann</i>	93
Production weld quality assurance through monitoring of beam characteristics <i>Colin Ribton, Arben Ferhati, Nick Longfield, Phil Juffs</i>	101
Effects of electron beam smelting on removal of inclusions in nickel-based superalloys <i>Qifan F. You, Yi Tan, Longhai Zhao, Pengting T. Li, He Li, Huiping P. Liu, Jiayan Y. Li, X. F. Ding</i>	106
Influence of EB parameters on the temperature-time profile during EB hardening as a single or combined surface treatment <i>Grumbt Grumbt, Anja Buchwalder, Anne Jung, Philipp Hengst, P. Hollmann, Rolf Zenker</i>	112
Thermal model in electron beam welding with various dynamic positioning of the beam <i>Tatyana V. Olshanskaya, Elena M. Fedoseeva, Vladimir Ya. Belenkiy, Dmitriy N. Trushnikov</i>	120
Modelling of the form of electron beam welding joints by regression model and neural networks <i>Tsvetomira S. Tsonevska, Elena G. Koleva, Lilyana St. Koleva, Georgi M. Mladenov</i>	126
Micro electron beam welding of the hybrid material combination Nitinol and stainless steel without filler material <i>Sebastian Hellberg, Sebastian Wagner, Dagmar Martin, Stefan Böhm</i>	131
Development of a miniature 3 axis magnetic field sensor to predict the magnetic stray field influence on electron beams <i>Peter J. Oving</i>	137

Simulation and experimental study on developed profiles in the positive polymer resist PMMA	142
<i>Elena Koleva, Katia Vutova, Ivan Kostic</i>	
Graphical user interface for investigation and optimization of electron beam induced grafting of starch	147
<i>Mirela Braşoveanu, Lilyana St. Koleva, Monica R. Nemţanu, Elena G. Koleva, Toni P. Paneva</i>	
Comparison of electron beam and laser welding for safety critical space applications	153
<i>Tim Mitchell, Chris Allen, Andrew Norman</i>	
Construction of a preliminary file backup system for surface analysis data using secret sharing technique	160
<i>Nobuharu Okamitsu, Tomonori Tabe, Ryota Matsuda, Noriyuki Yamada, Toyoharu Takemoto, Takeshi Tanaka</i>	
Experimental characterization of laser cladding of Stellite 21 on H13 tool steel	165
<i>Prakash Kattire, Valmik Bhawar, Sandeep Thakare, Rajkumar Singh</i>	
Possible applications of the electron source with a wide-mesh plasma cathode and the output beam into the atmosphere	171
<i>Maxim S. Vorobyov, Nikolay N. Koval</i>	
Comparative analysis of the secondary emission current and X-Ray radiation dependency on the beam's position along the joint during electron beam welding	176
<i>Vladimir Ya. Braverman, Valeriy V. Bogdanov, Nikolay V. Uspenskiy, Vladimir S. Belozertsev</i>	
Structure formation of high-temperature alloy by plasma, laser and TIG surfacing	182
<i>E. A. Krivonosova, Yu. D. Schitsin, D. N. Trushnikov, A. V. Myshkina, S. N. Akulova, S. D. Neulibin, A. Yu. Dushina</i>	
Using bremsstrahlung X-Ray for positioning of filled wire during electron beam surfacing	189
<i>Stepan Varushkin, Dmitriy Trushnikov, Elena Koleva, Dmitriy Shamov</i>	
Modeling and optimization of the resist profiles obtained by electron beam lithography	192
<i>Katia Vutova, Boriana Asparuhova, Elena Koleva, Ivan Kostic, Vladislav Gerasimov, Kristian Cvetkov</i>	
Modeling of the physical mechanical properties of steel 316 after EB treatment	197
<i>Volodia Dzharov, Elena Koleva, Vania Vassileva, Rozina Yordanova, Svetla Yankova</i>
