

## CONTENTS

	9	Preface
<i>G. Mladenov, E. Koleva, K. Vutova, I. Kostic, V. Spivak</i>	13	Resists for electron beam nanolithography
<i>Gagik Shmavonyan</i>	21	Modification of nanowires by charged ions beams
<i>M. E. Balezin, O. R. Timoshenkova, S. Yu. Sokovnin</i>	26	Using nanosecond electron beam to produce a silver nanopowder
<i>V. G. Il'ves, Yu. A. Kotov, S. Yu. Sokovnin</i>	30	Characteristics of ZnO and ZnS nanopowders production by pulsed electron beam evaporation
<i>V. A. Burdovitsin, A. V. Medovnik, E. M. Oks, N. S. Sochugov, M. V. Shandrikov</i>	34	Evaporation of graphite by electron beam, generated by fore-pump plasma source, and synthesis of carbon nano-objects
<i>M. G. Golkovski, N. K. Kuksanov</i>	36	Estimation of evaporation reactor parameters for producing of nanoparticle powders of different materials by method of source material evaporating with using of focused electron beam
<i>Victor M. Sveshnikov</i>	41	Calculation of the intensive charged particle beams on multiprocessing supercomputers
<i>Octav Marghitu, Reinard Becker, Silvia Marghitu, Constantin Oproiu</i>	46	Experiments and simulations on the DIADYN electron gun
<i>F.-W. Bach, A. Beniyash, R. Konya, A. Szlagowski, T. Hassel</i>	52	Non-vacuum electron beam diagnostics
<i>Martin Zobač</i>	59	Analysis of a high speed electron beam deflection system
<i>E. Koleva, G. Mladenov, K. Garkova, M. Kardjiev</i>	64	Quality Characterization of Electron Beams
<i>Ivan Vlček</i>	70	Study of the welding electron gun optical properties for work piece imaging
<i>Martin Zobač, Ivan Vlček</i>	73	Solid state high voltage supply for EB and X-ray generators
<i>Christian Karcher, Marek Ziolkowski, Hartmut Brauer</i>	76	Seebeck effect during electron beam welding
<i>L. Dupák, J. Dupák</i>	82	Planar Heating Element Adjusted by Electron Beam Micromachining
<i>P. Denysyuk</i>	85	Technology of electron-beam building-up of filler wires when repairing gas turbine engine parts
<i>A. A. Kaydalov, F. Kolenič</i>	89	Cleaning of material surface for electron beam technologies
<i>E. Kandaswamy, M. Mascarenhas, M. N. Jha, A. V. Bapat</i>	97	Optimum design of electromagnetic lens for electron beam welding machines
<i>Vladimir Braverman, Vladimir Belozercev, Vsevolod Bashenko</i>	100	Device for Automatic Seam Control
<i>N. Christova, E. Koleva</i>	104	Neural Network–Based Modeling and Optimization of EBW of Stainless Steel
<i>Frank Fischer, Uwe Hampel, Goesta Mattausch</i>	112	Ultra-fast electron beam X-ray CT scanner for industrial process tomography

<i>M. G. Golkovski</i>	113	The features of tungsten containing coats on the substrates from aluminum fabricated by method of vacuum-free electron beam surfacing
<i>Vladimir Biber, Anatoly Kuzmichev</i>	118	Double EB evaporation system for self-ion enhanced PVD
<i>Marco Klemm, Rainer Franke, Ingrid Haase, Andrea Rose, Rolf Zenker</i>	123	New electron beam multi-process technologies for the liquid phase surface treatment of aluminium materials
<i>A. Dalke, A. Jung, L. Hagymasi, A. Buchwalder, H.-J. Spies, H. Biermann</i>	128	Duplex surface treatment of aluminium alloys using electron beam surface alloying and nitriding
<i>Gundis Sacher, Rolf Zenker, Norbert Frenkler</i>	133	Improvement of the performance of hard coatings by subsequent electron beam hardening
<i>Anja Buchwalder, Rolf Zenker</i>	138	Electron beam liquid phase surface technologies for components made from high-loaded aluminium materials
<i>N. V. Gavrilov, A. S. Mamaev</i>	142	Low-temperature nitriding of titanium and titanium alloys by electron-beam-generated plasma
<i>M. V. Radchenko, I. S. Mihajlov, T. B. Radchenko, S. A. Mankovskij, S. G. Uvarova, Y. O. Shevtsov</i>	149	The comparative analysis of electron-beam cladding and gas flame powder cladding
<i>Karsten R�uthrich, Rolf Zenker, Anja Buchwalder, Norbert Frenkler</i>	152	Investigations of Electron Beam Profiling of Metal Surfaces
<i>I. E. Filatov, Yu. N. Novoselov, V. V. Uvarin</i>	156	Inter-phase processes of styrene conversion in air ionized by pulsed electron beam
<i>D. L. Kuznetsov, I. E. Filatov, V. V. Uvarin</i>	160	Investigation and optimization of methane conversion in mixtures processed by rep-rated electron beams and discharges
<i>D. L. Kuznetsov</i>	165	Influence of electron attachment processes on the efficiency of sulfur dioxide removal in pulsed non-self-sustained discharges
<i>V. V. Uvarin, D. L. Kuznetsov, I. E. Filatov</i>	170	Application of pulsed electron beam in radiation-catalytic technology of methane conversion
<i>N. K. Kuksanov, R. A. Salimov, P. I. Nemytov, A. V. Lavruchin, Yu. I. Golubenko, D. A. Kogut, V. K. Chakin, S. N. Fadeev, A. I. Korchagin, N. I. Gromov, V. G. Vankin, A. I. Roikh, S. P. Lystchikov, M. N. Stepanov</i>	174	High-automated equipment complex for EB cross-linking of cable insulation
<i>S.Y. Kornilov, I.V. Osipov, N.G. Rempe</i>	177	Simulation of emitting processes in plasma-cathode electron gun
<i>S. Y. Kornilov, I. V. Osipov, N. G. Rempe</i>	181	Properties of the beams produced in plasma-cathode electron-optical systems
<i>D. A. Antonovich, V. A. Gruzdev, V. G. Zalesski</i>	186	The gas-discharge structure for the formation of radial electron beams
<i>S. V. Denbnovetskiy, V. G. Melnik, I. V. Melnik, B. A. Tugai</i>	189	Technological possibilities of high voltage glow discharge electron guns
<i>Yu. A. Burachevsky, V. A. Burdovitsin, A. V. Medovnik, A. K. Goreev, E. M. Oks And I. S. Zhirkov</i>	193	Electron beam oxidizing of metal and semiconductor surfaces, based on fore-pump plasma source
<i>V. A. Burdovitsin, A. S. Klimov, E. M. Oks, Yu. A. Burachevsky, A. V. Medovnik, A. K. Goreev</i>	195	Electron beam processing of dielectrics by fore-pump plasma cathode electron source
<i>V. A. Burdovitsin, Yu. A. Burachevsky, A. S. Klimov, E. M. Oks, A. V. Tjunkov</i>	198	Ribbon beam generation by plasma cathode electron source

<i>S. Y. Kornilov, I. V. Osipov, N. G. Rempé</i>	201	Electron-beam equipment based on a plasma-cathode gun for science researches
<i>Peter Feinäugle, Gösta Mattausch, Frank-Holm Rögner</i>	204	Cold cathode electron beam sources for high-rate PVD
<i>Takeshi Tanaka, Kousuke Tanaka</i>	210	Generation of H <sub>2</sub> O plasma for plasma-based ion implantation sterilization
<i>Christoph Metzner, Bert Scheffel, Jens-Peter Heinss, Henry Morgner</i>	212	Plasma activated high-rate deposition with axial electron beam guns
<i>N. I. Grechanyuk, I. N. Grechanyuk, P. P. Kucherenko</i>	217	Modern electron beam technologies and equipment for melting of metals and alloys, deposition of protective coatings, producing of the composition materials condensed from a steam phase and powders
<i>V. G. Grechanyuk, Y. U. Artuh, V. O. Denisenko, A. V. Starostina</i>	223	Corrosive and thermal stability of composition materials (Cu-Sn)-Mo
<i>N. I. Grechanyuk, R. V. Minakova, E. V. Khomenko, G. E. Kopylova, V. V. Bukhanovsky, T. L. Yarosh</i>	226	Structure formation of Cu-W(Mo,Cr) condensate materials
<i>V. Chernyavskyy, N. Levitsky, A. Gladkov, T. Lapshuk</i>	238	Electron beam skull melting of multicomponent zirconium alloy
<i>S. Ladokhin, V. Vahrusheva</i>	241	Electron beam technology use for zirconium alloys melting and tube billets production
<i>V. G. Glebovsky, S. I. Bozhko</i>	245	The growth of tungsten single crystals of high structural quality by the electron-beam floating zone technique
<i>K. Vutova, V. Vassileva, E. Koleva, E. Georgieva, G. Mladenov, D. Mollov, M. Kardjiev</i>	252	Investigation of electron beam melting and refining of Ti and Ta scrap
<i>G. M. Mladenov, M. N. Petkov, D. Mollov, S. Velinova, E. G. Koleva</i>	260	Deposition of TiO <sub>2</sub> thin films by plasma-cathode electron beam evaporation in oxygen atmosphere
<i>E. Koleva, G. Mladenov, I. Vuchkov, K. Velev, B. Lamond, D. Petrova</i>	264	Program tool EBMR-MREDO for robust engineering quality optimization of EBMR of titanium
<i>Artur Wiechczynski</i>	270	RETECH & SECO/WARWICK S.A. announce commissioning trials of EB melting furnace ongoing at one of the CIS customer
<i>Matthias Neumann</i>	271	50 Years Von Ardenne Electron Beam Technology
<i>Englen Azizov, Alexey Emelyanov, Nikolay Rodionov, Vladimir Yagnov</i>	278	Decontamination of liquid with a help of electric discharges
	290	Authors' Index / Inhalt/ Содержание
